

## PROJECT DESIGN PHASE-I

### Solution Architecture

Date	06 May 2023
Team ID	NM2023TMID11143
Project Name	Intelligent Garbage Classification using Deep Learning

### Solution Architecture

Solution architecture is a complex process – with many sub-processes – that bridges

The gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behaviour, and other aspects of the Software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed,

And delivered.
